PROFESSIONAL SUMMARY

Web Application Developer with 2 years of hands-on experience building responsive, component-driven interfaces in React (Hooks, functional components, Context API) and Angular. Comfortable working across the full stack, integrating front ends with RESTful APIs (Spring Boot, .NET) and SQL/NoSQL databases. Strong focus on performance optimization, debugging, and Git-based workflows.

Experienced in contributing across multiple stages of the software development lifecycle, including implementation, testing, and maintenance. Demonstrates a practical problem-solving approach, effective collaboration within cross-functional teams, and the ability to adapt quickly in fast-paced development environments.

WORK EXPERIENCE

WEB APPLICATION DEVELOPER

PAKISTAN AIR FORCE

Islamabad, Pakistan

JULY 2024 - Present

Application: Electronic Records Management System (ERMS)

Role: Frontend Developer

Responsibilities:

- Built dynamic dashboards with interactive graphs and real-time data visualization using React Hooks and functional components.
- Developed reusable, scalable UI components following modern React practices to keep the codebase maintainable as features grew.
- Integrated React front ends with Spring Boot RESTful APIs, implementing complex data filtering and client-side state management.
- Improved application performance through code optimization, refactoring, and more efficient component structuring.
- Identified and resolved bugs across the stack to maintain system stability, reliability, and responsiveness.

Project: Office Automation System (OAS)

Role: Full Stack Developer

Responsibilities:

- Contributed to the development of an enterprise-level Office Automation System using Angular for frontend and .NET for backend services.
- Designed and built the Planner UI in Angular, improving usability and streamlining workflow efficiency for end users.
- Developed .NET RESTful APIs and optimized SQL Server stored procedures through query profiling and performance tuning.
- Implemented PIN authentication and Help & Support modules with structured error handling to improve reliability.

Project: Biometric Desktop Application

Role: Software Developer

Responsibilities:

- Built a Windows-based biometric application in C# / Windows Forms, including UI for fingerprint capture and user management.
- Integrated a third-party biometric SDK to handle fingerprint acquisition and authentication workflows.

TECHNOLOGIES & SKILL

Programming Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, SQL

Frontend: ReactJS, Angular, Windows Forms

Backend: Node.js, Spring Boot, .NET.

Databases: SQL Server (T-SQL), MongoDB

API Development: RESTful APIs

Tools: Git , GitHub, Sourcetree

EDUCATION

BAHRIA UNIVERSITY ISLAMABAD

February 2020 - January 2024

Bachelor of Science in Computer Science

CGPA : 3.48

CERTIFICATES

AWS Academy Cloud Architecting

AWS Academy Cloud Foundations

SCRUM Fundamentals Certification
