

# 1. Planner

## Overview

The **Planner** module allows users to organize and manage their schedules by creating **meetings and reminders**. Users can also share reminders with other participants and manage their scheduled activities directly from the planner.

## Key Features

### 1.1 Add Reminders

Users can create reminders for specific dates and times through the Planner.

To add a reminder:

1. Navigate to the **Planner** module.
2. Select the required date.
3. A pop-up window will appear.
4. Enter the reminder details.
5. Save the reminder.

### 1.2 Manage Reminders

Users can manage existing reminders directly from the Planner.

Available actions include:

- **Edit** – Modify the details of an existing reminder.
- **Delete** – Remove a reminder from the Planner.
- **Move** – Drag and drop a reminder to another date/time when required.

### 1.3 Drag-and-Drop Reminders

The Planner provides a **drag-and-drop functionality** for reminders. Users can easily move a reminder from one date or time slot to another without having to recreate it.

### 1.4 Add Participants

Users can add **participants** to a reminder. Adding participants allows the reminder to be shared with the selected users so that they can also be informed about the scheduled activity.

### 1.5 Add Meeting

The Planner includes an **Add Meeting** option that allows users to create and schedule meetings.

Users can select **Add Meeting** and provide the required meeting information to schedule the meeting.

---

## 2. Help & Support

### Overview

The **Help & Support** module provides users with resources to understand and effectively use the system. It contains documentation, downloadable forms, and multimedia guides for different modules.

### Key Features

#### 2.1 User Guide

The **User Guide** section provides detailed instructions and information about the system's modules and functionalities.

Users can refer to the User Guide whenever they need assistance with using a particular feature.

#### 2.2 Forms / Performa

The **Forms / Performa** section provides relevant forms and performas that users can download and use as required.

Users can:

- View available forms.
- Download forms/performas.
- Use the downloaded documents for the required processes.

#### 2.3 Video Guides

Video guides are available for individual modules to provide users with a visual explanation of system functionality.

Each video guide demonstrates how to use the relevant module and its features.

#### 2.4 Voice Guidance

The video guides are accompanied by **voice narration**, providing step-by-step verbal instructions to make the functionality easier to understand.

## 3. TinyMCE Editor

### Overview

The system's **TinyMCE Rich Text Editor** has been upgraded to provide an improved and more modern editing experience.

### Version Upgrade

The TinyMCE editor has been upgraded from:

**TinyMCE 4.9.11 → TinyMCE 8.4.0**

### Purpose of the Upgrade

The upgrade provides the application with a newer version of the editor and helps ensure compatibility with the latest TinyMCE functionality and improvements.

## 4. Follow-Up Chat

### Overview

The **Follow-Up Chat** feature enables users to communicate directly with the recipient of a forwarded letter. This provides a dedicated communication channel alongside the letter, allowing users to discuss, clarify, and follow up on matters without leaving the system.

### Key Features

#### 4.1 Chat with Letter Recipient

When a letter is forwarded to another user, a **chat panel** is available alongside the letter. Both users can communicate through this chat.

Users can use the chat to:

- Discuss the contents of the letter.
- Request or provide clarification.
- Share follow-up information.
- Coordinate actions related to the letter.
- Maintain communication within the context of the forwarded letter.

#### 4.2 Context-Based Communication

The chat is associated with the relevant letter, making it easier for users to understand which matter the conversation relates to.

This reduces the need for separate communication channels and keeps relevant discussions together with the corresponding letter.

#### **4.3 Follow-Up and Collaboration**

Users can use the chat to coordinate with the recipient after forwarding a letter, helping improve communication and reducing delays in completing required actions.

---

## **5. PIN Authentication**

### **Overview**

The **PIN Authentication** feature provides an additional layer of security for user accounts. Users are required to authenticate using their configured PIN during the login process.

### **Key Features**

#### **5.1 Secure Login**

After entering the required login credentials, users are prompted to provide their **PIN** for authentication.

This additional authentication step helps protect user accounts and restrict unauthorized access.

#### **5.2 Enhanced Account Security**

PIN authentication adds an additional security layer beyond the standard login credentials, helping safeguard sensitive information and system activities.

#### **5.3 User Authentication**

The system validates the entered PIN before granting access to the application.

**Note:** Users should keep their PIN confidential and should not share it with other individuals.

---

## **6. Letter Tracking**

## Overview

The **Letter Tracking** feature allows users to search for and monitor letters within the system. It provides users with a convenient way to locate a specific letter and follow its progress.

## Key Features

### 6.1 Search Letters

Users can search for letters using the available search criteria.

This allows users to quickly locate a specific letter without manually navigating through multiple records.

### 6.2 Track Letter Status

Once a letter is located, users can view its available tracking information and monitor its progress through the system.

### 6.3 Letter Traceability

The tracking functionality provides greater visibility into the movement and processing of letters, helping users determine the current status of a letter.

### 6.4 Easy Access to Letter Information

Users can use the tracking facility to quickly access relevant information associated with a letter and follow up when necessary.

---

## 7. Custom Reminder Notifications

### Overview

The **Custom Reminder Notification** feature helps users stay informed about important reminders and deadlines. Users receive a notification when the configured reminder reaches its end date.

## Key Features

### 7.1 Reminder End-Date Notification

When a reminder reaches its defined **end date**, the system generates a notification to inform the user.

This helps users keep track of important deadlines and prevents scheduled activities from being overlooked.

## **7.2 Timely Alerts**

Notifications provide users with timely awareness of reminders that have reached their specified end date.

## **7.3 Improved Task Management**

The reminder notification functionality helps users manage their schedules more effectively and ensures that important dates and activities are not easily missed.

## **7.4 Reminder Management**

Users can create, edit, and manage reminders through the **Planner** module, while the notification mechanism provides alerts based on the configured reminder dates.
