PROFESSIONAL SUMMARY

Web Application Developer with nearly 2 years of hands-on experience designing and building scalable, responsive web applications. Proficient in modern frontend frameworks such as ReactJS and Angular, along with backend development using Spring Boot, Node.js, and SQL-based databases. Strong understanding of RESTful API design, system performance optimization, and debugging techniques to ensure reliability and efficiency.

Experienced in contributing across multiple stages of the software development lifecycle, including implementation, testing, and maintenance. Demonstrates a practical problem-solving approach, effective collaboration within cross-functional teams, and the ability to adapt quickly in fast-paced development environments.

WORK EXPERIENCE

WEB APPLICATION DEVELOPER

PAKISTAN AIR FORCE

Islamabad, Pakistan

JULY 2024 - Present

Application: Pilot Electronic Folder

Role: Frontend Developer

Responsibilities:

- Developed dynamic dashboards with interactive graphs and real-time data visualization using React Hooks and functional components.
- Built reusable and scalable components using modern React practices (Hooks and functional components) to ensure maintainable code architecture.
- Integrated frontend components with Spring Boot RESTful APIs, implementing complex data filtering and state management.
- Enhanced application performance through code optimization, refactoring, and efficient component structuring.
- Identified, debugged, and resolved issues to ensure system stability, reliability, and responsiveness.

Project: Office Automation System (OAS)

Role: Full Stack Developer

Responsibilities:

- Contributed to the development of an enterprise-level Office Automation System using Angular for frontend and .NET for backend services.
- Designed and developed the Planner UI, improving usability and streamlining workflow efficiency.
- Developed .NET RESTful APIs and optimized SQL Server stored procedures using query profiling and performance tuning.
- Implemented PIN Authentication, Help & Support modules and structured error handling to enhance system reliability.

Project: Biometric Desktop Application

Role: Software Developer

Responsibilities:

- Developed a Windows-based biometric application using C# and Windows Forms.
 - Designed intuitive user interfaces for fingerprint capture and user management functionalities.
 - Integrated a third-party biometric SDK for fingerprint acquisition and authentication workflows.
-

TECHNOLOGIES & SKILL

Programming Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, SQL

Frontend: ReactJS, Angular, Windows Forms

Backend: Node.js, Spring Boot, .NET.

Databases: SQL Server (T-SQL), MongoDB

API Development: RESTful APIs

Version Control: GitHub, Sourcetree

EDUCATION

BAHRIA UNIVERSITY ISLAMABAD

February 2020 - January 2024

Bachelor of Science in Computer Science

CGPA : 3.48

CERTIFICATES

AWS Academy Cloud Architecting

AWS Academy Cloud Foundations

SCRUM Fundamentals Certification
